WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY

International application No.  
PCT/US05/03168

**Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)

Claims 1-22 YES  
Claims NONE NO

Inventive step (IS)

Claims NONE YES  
Claims 1-22 NO

Industrial applicability (IA)

Claims 1-22 YES  
Claims NONE NO

2. Citations and explanations:

Claims 1-22 lack an inventive step under PCT Article 33(3) as being obvious over Arrott et al (WO 01/75752 A2).

Claims 1-22, Arrott teaches a system for avoiding transaction costs associated with trading orders comprising a memory and a processor (See Figure 1). The memory stores an order identifier associated with a trading order and a time threshold associated with the trading order (See Pages 7-8). The processor monitors the length of time the trading order is active with a market center that is processing the trading order (See Pages 8-13). The processor further determines a timeout when the length of time the trading order is active with the market center equals or exceeds the time threshold (See Pages 8-13). The processor then communicates a cancel instruction for the trading order in response to determining the timeout (See Pages 8-13).
